

For the last 25 years, Spartan Safety's primary goal has been to exceed our client's expectations. As a business we focus on ensuring that we deliver not only quality products but also quality service. In order for us to achieve this, we have worked to our own internal quality management system, which has allowed us to constantly deliver high standards.

Already a RISQS verified and BSIF registered organisation, we constantly strive to improve on our high standards and ultimately to demonstrate our commitment to all of our clients. In order for us to achieve this goal, we recently made the decision to have our quality management system formalised.

We are pleased to announce that as of 4th July 2018 Spartan Safety Ltd is now both ISO 9001-2015 Quality Management System and ISO 14001-2015 Environmental Management System accredited.

ISO 9001 quality management system accreditation, will allow us to continue to develop our internal policies, procedures and systems and ultimately work even more efficiently and effectively, and to provide all of our clients with the peace of mind that they will continue to receive a professional service from us.

ISO 14001 environmental management system accreditation is testament to our ongoing obligation to not only reduce our carbon footprint and to continue to source and supply products from businesses which share our objectives, but wherever possible, to assist our clients to meet their own environmental ambitions.
